Project Title	Food Ordering Behaviour and Consumer Trends
Maximum Marks	3 Marks

Project Proposal (Proposed Solution) template

This project proposal outlines a solution to address a specific problem. With a clear objective, defined scope, and a concise problem statement, the proposed solution details the approach, key features, and resource requirements, including hardware, software, and personnel.

Project Overview	
Objective	To analyze food ordering behavior and consumer trends using Tableau by identifying popular cuisines, customer preferences, meal types, ratings, and city-wise ordering patterns. The project aims to provide interactive visual insights that support better business decision-making.
Scope	The project focuses on analyzing restaurant and food ordering data using Tableau. It includes data preparation, visualization, dashboard development, and story creation to identify customer behavior and restaurant performance. The project is limited to the provided dataset.
Problem Statement	
Description	Restaurant owners and food delivery businesses generate large amounts of order data every day. Analyzing this data manually is difficult, making it challenging to understand customer preferences, popular cuisines, revenue trends, and overall business performance.
Impact	The proposed solution helps businesses make data-driven decisions by providing interactive dashboards and visual insights. It supports menu planning, marketing strategies, customer satisfaction, and operational improvements.
Proposed Solution	

Approach	The project uses Tableau to connect, clean, and analyze the restaurant dataset. Various charts, filters, KPIs, parameters, dashboards, and stories are created to visualize customer ordering behavior and restaurant performance effectively.
Key Features	• Interactive Tableau Dashboard • Customer Order Trend Analysis • Cuisine Preference Analysis • City-wise Order Analysis • Meal Type Analysis • Customer Rating Analysis • Revenue Insights • Interactive Filters and Parameters • Tableau Story for Business Insights

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Intel Core i3/Ryzen 3 or higher, Dual-Core Processor
Memory	RAM specifications	8 GB RAM
Storage	Disk space for data, models, and logs	Minimum 10 GB Free Space
Software		
Frameworks	Python frameworks	Not Applicable
Libraries	Additional libraries	Not Applicable
Development Environment	IDE, version control	Tableau Desktop
Data		
Data	Source, size, format	Food Ordering Dataset (CSV Format)
